WORK EXPERIENCE

KWAN | Front End Developer | 2021/02 - Present

Project A: Email storage management platform

- Dev team of 4, working in an **Agile** environment.
- Initiated this project **from scratch**.
- Worked with **JWT** tokens, **AWS S3** bucket management, **REST API integration** with the Front End.
- Developed tests with **Jest** and **Sinon**, implemented **input field validation** and contributed to the codebase and the company's **React component library** with new easily-maintainable and **reusable** components.
- Defined styling with **Styled-Components**.
- Built **custom Hooks** to remove complexity and responsibility from the components.

React JS TypeScript Redux Jest Atlassian Git Node

Project V: eSourcing and eProcurement platform

- Mid-sized company with various development teams involved.
- Created a desktop app to improve the **translations** mechanisms from an open-source Vue JS project. Used **i18n** for translations.
- Jumpstarted **Jest** testing on the product.
- Contributed to the **React component library**.
- Developed many shortcut **features** to fasten the customer's journey in the platform along with my Back End team-mates.
- Was involved in the revamp of the company's work methodology and **codebase refactoring**.
- Significant role in **improving team bonding and togetherness**.

React JS TypeScript Redux Jest Azure Git Vue JS

DELOITTE | Full Stack Developer | 2020/02 - 2021/02

- International project in the insurance industry.
- Developed new features **end-to-end**.
- Wrote **SQL** scripts to extract needed information from the database.
- Maintained a Front End module in Ext JS. Added new features like **pagination** and extensive **input field validations**.
- Worked in several features with **foreign colleagues** from the UK, India and Uruguay regularly.

Ext JS JavaScript SQL C# Azure Git

CRITICAL SOFTWARE | Summer Intern | 2019

- Got in touch with many developers, managers and technologies used in this Portuguese company.
- Learned the basics of **React JS building** building a small website.
- Completed various challenges, each connected to the different areas of business of this company.

UNIVERSIDADE DE AVEIRO

Degree in Software Engineering | 2016-20

Python Java Data Structures & Algorithms ...

ADDITIONAL EXPERIENCE

AS RAPARIGAS DO CÓDIGO

Mentor & Team Leader | 2020 - Present

- Showing women that **tech can be exciting**, rather than scary. For everyone.
- Providing **workshops** and **mentoring** mainly on JavaScript, React and Git.
- **Team leader** for the Partnerships team.
- **Pitching** our work to potential **partner** companies.
- Active role on the organization's **decision-making**.

EDIT.

Tutor | 2022/07 - Present

- **Git and GitHub** and **React JS** tutor.
- Guiding students through **SPA development** using **React JS**, using **Git** as a tool for versioning and team work and showing the power of **GitHub as a platform**.
- Two years after being a student, I was invited to **teach and help others start or improve their tech career**.

THE DRAWING DEV

Freelance illustrator | 2021 - Present

- Online page and store where I display and sell my work as a **self-taught illustrator**.
- Connected with and befriended highly successful illustrators from other all over the globe.
- Everything is drawn in **Affinity Designer**, but the first ones were done with **Figma**.

AJO

Football reporter | 2021

- Wrote **monthly two-page reports** on the football clubs of the Oeste region for AJO's **newspaper**.
- Focused on **Caldas SC** and **SCU Torreense**.
- Provided match **reports, stats** and **comments** on both clubs' performances.
